

I wish to make a few comments regarding NAB's petition 04-160 and why I hope that you reject the requests of the NAB. I am a subscriber to the services offered by XM Satellite Radio and I simply cannot get the quality and variety of services they provide from any other source. I travel extensively and find that the services they provide beat any others anywhere I travel. I especially like the ability to access weather conditions and traffic coverage that is offered the way XM radio provides it. No regular broadcast station will ever be able to give its listeners that type of coverage to the traveling public. I pay for the services that XM radio provides and no regular broadcast station would ever be able to provide the same high quality news, weather and traffic information without having to resort to a paid programming system. I respectfully request that you reject NAB's petition 04-160. Thank you very much, Gareth Simmons
